

Ideation Phase – Brainstorm & Idea Prioritization Template

Project Name: ComplaintEase – Advanced Complaint Management Platform
Date: 20 June 2026

Step 1: Team Gathering, Collaboration and Select the Problem Statement

Manual complaint handling through emails, paper forms and spreadsheets causes delays, poor tracking, lack of transparency and reduced accountability.

Step 2: Brainstorm, Idea Listing and Grouping

- Online Complaint Submission Portal
- AI-based Complaint Categorization
- Real-time Notifications
- Complaint Tracking Timeline
- File Attachments via Cloudinary
- Admin Analytics Dashboard
- Department-wise Assignment
- PDF/CSV Report Generation
- Audit Logs
- Complaint Rating System

Grouped Ideas

User Features: Submission, Tracking, Notifications, Ratings

Admin Features: Analytics, User Management, Reports, Audit Logs

Smart Features: AI Categorization, Real-time Communication

Step 3: Idea Prioritization

High Impact / High Feasibility: Complaint Submission, Tracking, Notifications, Dashboard

High Impact / Medium Feasibility: AI Categorization, Analytics

Medium Impact: Rating System, Advanced Reporting

Selected Final Idea

ComplaintEase is a MERN-based complaint management platform that enables users to register complaints, track status, receive notifications, communicate with administrators, and view real-time updates. Administrators can manage complaints, departments, analytics, reports, and audit logs from a centralized dashboard.
